

Lesson 7: Just a Phase

Science Terms

Melting: changing from a solid to a liquid; this occurs at the melting point

Freezing: changing from a liquid to a solid; this occurs at the freezing point

Boiling: changing from a liquid to a gas; the highest temperature a liquid can reach before turning into a gas; this occurs at the boiling point

Evaporating: changing from a liquid to a gas; this can occur at different temperatures

Condensing: changing from a gas to a liquid; this can occur at different temperatures
